## UK Logistics Location Strategy **ebook**

We're living in a time when the chances are:

- Your **demand patterns may have changed** because of Covid and ecommerce
- Your **sourcing arrangements may have changed** because of Brexit and / or Covid
  - Your **transport will need to change** because of the drive to cut carbon

### But has your logistics changed to match?

If you're thinking of relocating facilities or carrying out logistics network redesign, and would appreciate some useful advice before you get started, then this pdf ebook is for you – it aims to be:

- A compact primer for people who are thinking of carrying out a logistics network study
  - A reasonably easy read (Version 2: 1 hour/20 pages/7.5K words), but covering a width of aspects
- And its objective is to help you make the right decision about your project by sharing experience.

For **£27**, it's yours - to buy, fill in your details: <http://www.aricia.ltd.uk/contact.aspx> - just put '**ebook**' in comments box – we'll aim to email you back on the same day.

If you want to know some more, here's a preview of the contents and a comment from the author:
